■CMSD·CMSDG Assembly Instructions

Disassembly

- 1) Remove Hexagon Socket Head Bolt (③), pull out Guide Bar (⑤) from Cam Holder (②) to the rear for 30 mm, and then remove Guide Bar and Cam Slider (①④).
- 2) Pull up Guide Bar to remove from Cam Slider.

Assembly

Assembly is the reverse procedure of disassembly.

- Ensure that all parts are clean, particularly the sliding components, to which a small amount of lubricant is applied and is then placed on position.
- Take care the respective tolerances are observed when assembling Guide Bar, Cam Slider and Cam Holder, which also should be identified by the same serial number.
- · Ensure that all bolts are tightened to the recommended torque.

⚠ Gas Spring

Please contact your local sales representative if you prefer to use a gas spring not specified in our catalog. For use and maintenance of gas spring, please contact the manufacturer directly.
